MOSAIC													
TYPE	SIZE	FINISH	CHIP SIZE	MOUNT	PCS/BOX	GROUT TYPE	INTERIOR			EXTERIOR			MATERIAL
							WALL	FLOOR	WET AREA	WALL	FLOOR	POOL	
Block	12"x12"	Matte	3/4"x3/4"	Mesh	12	Sanded	x	x		x			Porcelain

The thickness of Lightning is equal throughout the chips, with a minimum tolerance of tenths of a millimeter, and is precisely adhered to the mesh sheet by machine. Any difference in thickness or appearance will not be noticeable once installed and grouted.

Grout joint spacing must be 2mm to allow continuity between sheets. Using any other grout joint spacing will lead to irregularities and make the single sheets visible.

Installation recommendations: Planarity and stability in the substrate is needed. Use a 5mm notched trowel for spreading adhesive. Cement based grout is preferable (epoxy grout is not recommended).

All sizes are nominal
